

# Pricebook Center

“I’m finally able to manage the material side of our business. I like how the Pricebook links with my local material vendors for automatic price updating inside my COBRA. It’s easy to lookup materials—I can choose from a variety of look-up searches....I’m particularly partial to your Vendor Part # search because I only have to enter 2-3 characters and COBRA finds the item for me. Your program is much easier to use than other, bigger programs I’ve used in the past. “

Mark N. Service Manager, Southside Heating & AC

- Powerful “Price Evaluator” saves you as much as 10 % - 20 % on Material Purchases.
- Built-in Bar Coding *increases efficiency*—both in the warehouse and in the field when using scanners.
- Auto Vendor Price Updating *lowers your operating costs* by updating material costs, Flat Rate Tasks and Assemblies (Kits) at the same time.
- Price History tracking and Item Usage reporting help you *negotiate a better price* from your Vendors.
- Purchase Order Status Checker *saves dollars* by alerting you from overbuying for the job / warehouse / service vehicles.
- Serial Number, Model Number and Warranty Tracking updates Customer and Job records for *production continuity*.
